

37. HE EVEN ENJOYED SIPPING SCREWDRIVERS and ran to give Mommy the cherry from his drink when she was dancing on the floor with a friend! The band sang a song with Davidito's name in it, and when they sang "Adios!" he waved to them, and danced in our arms 'til he fell asleep! XXX!

and scared him. Alfred and I danced with him, and then Mommy & Daddy introduced him to friends.

"TESTIMONY PRAYERS"--16 Mos. Old--By Sara Davidito. 6/76 DFO S-27
--Chapter 30 of "Davidito".

1. TIME WITH MOMMY & DADDY: One beautiful sunny morning Daddy showed Davidito and me three little fledglings cuddled up on a tree branch just outside Mommy and Daddy's window.--So cute!-- Some of MO's little birdies!

2. DAVIDITO HEARD MOMMY SAY THAT SHE WOULD LIKE SOME CHOCOLATE MILK like he had, so he immediately motioned for the chocolate tin of powder so he could make it for her, just as he had done for himself. He scooped out a big spoonful and stirred it in all by himself--so proud that Mommy was watching. He was just thrilled that he had made Mommy's snack!

"I like Daddy's snack too."

3. DADDY WARNED US that children should never put matches in their mouth because the phosphorous head is very poisonous and can make them very sick!

4. ONE MORNING AT BREAKFAST HE "WHINED" FOR A DRINK, but when I

gave him his cup, he suddenly put his hands over his face! I wondered, "Now, what's that for?", because he uses so many hand signals I have to interpret what he is trying to say. Then I remembered that we hadn't prayed yet and he was closing his eyes to begin the prayer.

5. USUALLY WHEN I SAY, "LET'S PRAY" HE REACHES OUT TO HOLD OUR HANDS. And if I say, "Close your eyes", he releases his handhold to cover his eyes with the back of his hands. Daddy said, "Whoever said you have to close your eyes to pray, anyway?!" So we just let him pray however he wants to now!

6. HE FIGURED OUT HOW TO SOFTEN HIS SANDWICH made of hard bread by letting the garden faucet drip on it first. Daddy said, "Now that's what I call smart!!" He likes the Spanish way of dipping his cracker into milk or juice before eating too.

7. BEHAVIOUR AND DISCIPLINE: HE'S BEEN TEETHING AGAIN LATELY --his jaws are puffy and he won't eat certain foods. When we ask him what's wrong, he points to his jaw to show us where it hurts.
